Section 1 – Gameplay

1. General

1.1.1 Regular season and playoff games must be played 6 vs. 6. It is up to Team Management to make sure they have a full line-up at game time.

1.1.2 If a player quits on his/her team during a game, the player will be eligible for suspension at the discretion of the VGHLDC.

1.1.3 VGHL Game times are as follows all in EST.

NHL 9:30/10:30, AHL 9:35/10:35, and PHL 9:40/10:40

1.1.4 If you do not have a full roster at game time there will be a **10 minute window** to start the game. If a team is unable to play and they are out of reschedules, a forfeit will be issued. If a team is not out of reschedules, they have up to 24 hours to post a reschedule request.

1.1.5 Teams discussing the possibility of FF or a reschedule must do so following the VGHL game night rules. If a game is to be rescheduled or forfeited, it is to be posted in the appropriate area and no game shall be played that evening. If these rules are ignored, and a game is played, the game is official and no other decision can be made.

1.1.6 If any team uses an illegal roster, the result will be a 1-0 regulation forfeit win for the opponent.

1.1.7 The VGHL operates Sunday through Thursday.

1.1.8 All VGHL games will have the Home Team host the game.

1.1.9 If a team has an issue with a game which has already started and requires staff assistance for a potential forfeit win, the team must stop playing the game and send their evidence to the VGHLDC and their league commissioner for review . The staff will not reverse the results of any game if teams continue to play the game out unless invalid rosters were used. If a team stops a game that has started because they feel that the other team has broken a rule, the staff will review their evidence and decide which team shall receive the ff win. Partial games will not be restarted or rescheduled once they have been stopped for staff review.

2. Disconnects (DC)-

1.2.1 If any player disconnects before the 2 minute mark of the start of the game or of the restarted game, the game is to be paused at the earliest whistle and is to be restarted. All play up to the whistle, including any cpu stats will still carry over into the restarted game.

There will be no DC penalty for this restart.

1.2.2 If a single skater disconnects after the 2 minute mark of the first period, the game must be played until the next period. During the intermission the teams must take stats and restart. Upon restarting, play **CAN NOT RESUME** until the disconnected player takes a DC penalty and is in the penalty box. The 1st period becomes the first period to be made up.

1.2.3 If the goalie or two players from the same team have disconnected, the game is to be paused at the next available whistle. Each team is responsible for recording their stats and the time of the restart, then the game is to be restarted. All play up to the whistle will still be counted. If a goalie has disconnected then the team may choose who is to take the DC penalty. If players on both teams disconnected then the penalties are voided and no team has to take a DC penalty. If two players from the same team have disconnected then the team that had the DC's may choose between the two for taking the penalty upon restart. If two players DC only one DC penalty has to be taken.

1.2.4 If a player disconnects during an intermission (between periods), teams **MUST** continue into the next period and follow the above guidelines. Teams **NEVER** back-out and restart during intermission.

1.2.5 Any stats accumulated by computer players will carry over into the restart.

1.2.6 Teams have up to 10 minutes to restart the game after a DC. If a Team cannot produce the same lineup, NHL Teams must use an ECU. AHL Teams may use a player from their roster or an ECU. PHL Teams may use a player from their roster or an ECU. If an ECU is used, the ECU'd player must follow all ECU guidelines and the ECU will count as an official ECU. Any player replacing a DC'd player must replace that player in the exact same position which that player was playing before they DC'd.

1.2.7 If a Team is unable to restart the game after 10 minutes, the result will be a 1-0 regulation forfeit loss. If the DC occurred in OT and the team is unable to restart the game after 10 minutes then the result will be a 1-0 overtime forfeit loss.

1.2.8 Any player that disconnects twice during one game is not allowed to play in the next restart. Teams must replace this player following guidelines set in Rule 1.2.6. The ECU used must follow all ECU guidelines and the ECU will count as an official ECU.

1.2.9 If a team has any ongoing penalty time when a game must be restarted, the team is obligated to take that remaining time as well as the DC penalty.

1.2.10 The team that has the player/player's DC must pause the game and backout. If they do not and continue to play passed the above guidelines the game will result in a forfeit loss.

1.2.11 Each Team is responsible for their own stats on restarted games.

3. Game Freezes and Game Loops

1.3.1 If a game freeze or game loop occurs during a game, and the game is able to continue, the game must go on with whatever time, penalty minutes and score that the score clock is showing after the freeze or loop. Any goals lost as a result of a freeze or loop will not count towards the official game score. If a game freezes before the game ends and stats are not

able to be retrieved, the game must be restarted from the beginning of the game with a 0-0 score.

4.3.13 If a player under a extension contract is promoted to management, that player must honor the length of their contract as management for the remainder of their contract years. The player's salary will be adjusted by the league during the off-season should they chose to remain a manager. The Owner has the option to return the player to their roster during the off-season. The player would return as a player for the remainder of their contract years at their existing salary. The Owner may also choose to buy out the player per our buyout rules during the off-season.

4.3.14 Any One Way Contract (OWC) that has cleared waivers and is on an AHL team at season's end will automatically become a Free Agent. If that player has a extension contract, this rule still applies. The NHL team will continue to pay a buyout penalty for the remainder of their contract.

4.3.15 If a player that was signed to a One Way Contract (OWC) through Free Agent Bidding was promoted to Captain during the season, the Owner has the option to return the player to their roster during the off-season and use a PBR extension on him.

4.3.19 Teams may contact players with expiring contracts during the off-season before the captain selection deadline to offer them a management opportunity. If a player agrees to take a management opportunity, their expiring contract will be terminated immediately.

4.3.20 If a team has not selected a captain before the captain deadline, a fine of 500k will be handed out on a 24h cycle until a captain is named.

4.3.21 If a team is unable to name a free agent or a player with an expiring contract as their captain by the captain deadline, they may name a player acquired through a trade during the off season contract trade period as their captain. A fine of 500k will be handed out along with late fees in accordance with the rules set out in 4.3.19. The player's salary will also be set by the VGHL staff in accordance with the rules set out in 6.1.3.

4.3.22 Owners may trade the rights of players with extension contracts who have requested idle status if their contract is not expiring during the off season. Managers may not seek any form of compensation if the player does not return after their idle status expires.

- If the team that used the reschedule does not post their reschedule request within the 24 hour time period they will forfeit the game.

4.7.4 Teams are given until the end of the upcoming league week to complete their rescheduled games. The team that originally did not use the reschedule, can use a reschedule if needed. No team may reschedule the same game more than once.

Section 5 – Contracts

1. Re-signs

5.1.1 Each NHL team is allowed to re-sign 2 expiring contracts during the off-season contract period. A player's re-sign value will be determined by a Performance Based Rating system. A player's PBR will be based on their regular season performance.

Players will be given a PBR value in one of three categories; Forward, Defense, Goalie. A player's PBR category will be determined by which position they played the most throughout the regular season. If a player has played an equal amount of games in multiple PBR categories, they will be given the highest PBR value. All re-signs must fit within the guidelines set by the VGHL.

5.1.2 Players will receive a minimum re-sign value if they have not met the minimum games played for their PBR category. The minimum games played for all positions is 30 regular season games played.

5.1.3 Players will receive a minimum re-sign value if they have a PBR value lower than 0.

5.1.4 If a player that was signed to a One Way Contract (OWC) through Free Agent Bidding and was promoted to Captain during the season, the Owner has the option to return the player to their roster during the off-season and use a PBR re-sign on him.

5.1.5 Performance Based Rating Re-sign Values

3.00 to 3.49	100%
3.50 to 3.99	125%
4.00 to 4.00+	150%

5.1.6 Players that have a split salary during the season must be paid the PBR increase of their combined total salary.

5.1.7 All contract re-signs must be verified by the VGHLPA. If a player denies a contract re-sign, or does not respond to the PA before the Player Response deadline, the re-sign will be voided. Teams may re-use the voided re-sign again if the deadline has not yet passed.

5.1.8 Players have 48 hours after the off-season contract deadline to accept their offer. Players have the right to refuse contract re-signs.

2. Contract Extension Negotiation Period

5.2.1 The contract extension negotiation period will take place 3 weeks into the season. The official date and time will be added to the events section.

5.2.2 The maximum number of contract seasons to be given to one player is 2 seasons.

5.2.3 Teams may give out up to three extended contracts. Existing extended contracts on a team's roster will count towards the maximum amount of extension contracts that can be given out during the extension negotiation period.

5.2.4 It is not required that all extension contracts be given out.

5.2.5 Any teams who have more than four players on their roster with extended contracts during the off-season will be fined \$1,000,000 for each additional player. Fines will be applied to the upcoming season.

5.2.6 All contracts must be given out by the contract extension negotiation deadline. All contract transactions must be done in the Manager Control Panel.

5.2.7 All extension contracts must be verified by the VGHLPA. If a player denies the extension contract, or does not respond to the PA before the Player Response deadline, the extension contract will be voided and the player will remain on the roster as a one season contracted player. Teams may offer the voided extension contract to another player if the deadline has not passed.

5.2.8 Players have 48 hours after the contract extension negotiation deadline to accept their offer. Players have the right to refuse extension contracts.

5.2.9 NHL trades will not be processed during the contract extension negotiation period.

3. Entry Level Contracts

5.3.1 All NHL teams have two Entry Level Contracts (ELC) they can give to two AHL players with 2-way contracts. ELC's may be given during the season for the current season. Teams with remaining ELC's at the end of the season, can offer them to AHL players with 2-way contracts off their affiliate team during the Off-Season Contract Period. Players only have the right to refuse off-season ELC's.

5.3.2 ELC contracts will be set at a minimum salary of \$2,500,000.00. All players that are signed to a 2 way contract that exceeds \$2,500,000.00 are given an Entry Level Contract at their current salary.

5.3.3 Once a team signs a player to an in-season ELC they **may not trade that player for 14 days** from the time the contract was approved.

5.3.4 ELC contracts are for 1 season and they may not be extended. A player with an ELC may be re-signed per the player's PBR value once their ELC contract expires.

5.3.5 During the regular season, players that have an entry level contract can be sent down/called up without going through waivers. If an ELC player is sent down they are required to play 1 game before being called back up. If they are called up they are required to play one game before being sent back down.

5.3.6 Players signed to ELC's during the off-season may be traded once the VGNHL Entry Draft trade office opens and/or can be dropped to the AHL roster once the VGNHL waiver/transaction office opens.

5.3.7 In season ELC's may only be given out once the contract negotiation period has started up to the end of the regular season.

4. Buyouts

5.4.1 If an NHL Team wishes to buyout a player with a extended contract they must do so during the Off-Season Contract period. Teams must continue to pay 50% of the player's salary for the remainder of that player's contract.

5.4.2 If an AHL team wishes to buyout a player during the season, they must carry 50% of the contract for the remainder of the year. This rule also applies to 1 way contract players who have cleared waivers and are currently on an AHL team.

5.4.3 If an AHL team wishes to buyout a player after the Trade Deadline, they can not re-sign that player.

5.4.4 If a PHL team wishes to buyout a player during the season, they must carry 50% of the

contract for the remainder of the year.

5.4.5 If a PHL team wishes to buyout a player after the Trade Deadline, they can not re-sign that player.

5.4.6 Owners can remove management players from the franchise but are required to buyout their contract. All Captains and Assistants that are bought out are placed in free agency. NHL Captains can only be bought out before the Trade Deadline.

5. Franchise Tags

5.5.1 NHL teams can decide to add a franchise tag to one of their expiring NHL contracts. They will first need to request approval during the off-season contract period from the player in order to re-sign their contract. By adding the franchise tag, the player's salary would not be adjusted by the PBR and it would be locked in at the league average for that position, or at the player's current salary, whichever is higher.

5.5.2 Teams may offer a franchise tagged player a contract extension during the contract negotiation period per the rules which are outlined in section 5.2.

5.5.3 Each team may only add one franchise tag to a player's contract during that contract's life cycle. If a team wishes to add a franchise tag to the same player more than once, they will need to acquire that player again in a future season through pre-season or in-season bidding.

5.5.4 If a player with a franchise tag is traded, the franchise tag is dissolved and the player's contract will expire at the end of the current season, regardless of the amount of seasons remaining on the contract. Extension contract and franchise tag refunds will not be handed out and the trades will not be reversed in the event that managers were unaware of these rules. It is highly recommended that team's request approval to speak with franchise tagged players before agreeing to trade for them.

5.5.5 A team may never have more than one active franchise tag on their roster at any time.

5.5.6 A player who has had a franchise tag terminated via a trade or via the contract term may not be resigned per their PBR.

Section 6 – Salary Cap

6.1.1 No NHL team is allowed to go over the salary cap limit at any time.

6.1.2 NHL teams will have a total of \$32,500,000.00 cap space.

6.1.3 Each Owner and NHL captain will be given a salary appointed the VGHL Staff. Salaries will range from \$2,500,000.00 to \$6,500,000.00 and will be determined by PBR logic,

along with staff input.

6.1.4 The NHL minimum player salary is 500k.

6.1.5 Players with a one way contract who clear waivers and are sent to the AHL will have their salary reduced by 50%. The AHL team will pay the remaining 50% of the player's contract until the player is returned to the NHL.

6.1.6 Playoff teams that exceed the salary cap after the Trade Deadline must adjust their rosters to adhere to all salary and roster guidelines once the regular season has ended before advancing to the playoffs. If an owner is unable to adjust their roster, a NHL commissioner will present them with a plan of action that must be followed. Owners will be expected to have all changes submitted to the commissioner by the opening of the next office day for approval. Any owners refusing to adjust their rosters will be removed before the start of the playoffs. A NHL commissioner will then make all necessary adjustments

2. AHL

6.2.1 No AHL team is allowed to go over the salary cap limit at any time.

6.2.4 All 2-way players called up to the NHL will be removed from the AHL active roster and as such their salary will not be applied to the AHL salary cap. If a 2 way player is to return to the AHL and the AHL team does not have enough roster space and or salary cap, that player will be placed on AHL waivers and the NHL team will be forced to carry 50% of the players salary for the remainder of their contract.

3. PHL

6.3.1 No PHL team is allowed to go over the salary cap limit at any time.

6.3.2 PHL teams will have a total of \$9,000,000.00 cap space.

6.3.3 PHL owners and PHL captains will be given a set salary of \$500,000.00

Section 7 – Injured Reserve

7.1.1 The injured reserve is for players that will not be able to participate in league play for a limited amount of time. Teams may place an inactive player on IR, but they must report

inactive players to the VGHLPA for removal.

7.1.2 All teams that wish to place players on the IR must post their requests in the Manager Control Panel

7.1.3 Players placed on Injured Reserve must stay there for a minimum of 7 days.

7.1.4 Players must contact the PA if they require the use of the IR for 3 weeks or more. Team owners will be held accountable if a player has been placed on the IR for 3 weeks or more and the PA has not be notified. Improper use of the IR will result in a penalty at the discretion of the VGHLDC.

7.1.5 Players placed on the Injured Reserve will not count towards a team's salary cap or as a filled Roster Spot.

7.1.6 Teams may not place a player on the IR if it puts them below the minimum roster requirements.

7.1.7 Teams must have enough salary cap space and roster space for a player on the IR to return to the roster.

7.1.8 Players that are removed from the IR are required to play one game before being placed back on the IR.

7.1.9 If a player is improperly placed on the IR and is able to play teams will face a penalty at the discretion of the VGHLDC.

7.1.10 Players placed on the IR that are eligible to return must be returned to the roster. Team that do not have enough roster space and or salary cap to do so must place the player on waivers. The team will be forced to pay 50% of the players salary for the remainder of their contract.

7.1.11 Players placed on the IR may not be traded.

7.1.12 Team Management may not be placed on the IR during Regular Season.

7.1.13 NHL can not place a AHL TWC player on the NHL IR. If the player needs to be placed on the IR, he must be returned to the AHL and placed on the AHL IR.

7.1.14 Players that remain on the IR at the end of a team's season will be removed from the IR and placed on the team's roster. Teams that do not have enough roster and or salary cap to return the player will be forced to buy out the player and pay 50% of the players salary for the remainder of their contract.
